Meet Patel
Tech Lead

Summary

- Extensive expertise in Flutter, Firebase, Dart, and related technologies for the past 3 years.
- Proficient in building responsive mobile applications and integrating with Firebase services.
- Skilled in full project lifecycle development, from design to implementation and deployment.
- Experienced in working within agile teams and effective communication.
    .

Technical Skills

Client Side
- Developed mobile applications using Flutter framework with Dart programming language.
- Implemented state management using Redux or Provider for scalable and maintainable code.
- Proficient in building UI components with Flutter Widgets and Material Design principles.
- Familiarity with responsive design principles and widget layouts in Flutter.

Server Side
- Integrated Firebase services such as Firestore, Authentication, Cloud Functions, and Cloud Messaging into mobile applications.
- Developed backend services using Firebase Cloud Functions and Node.js for serverless architectures.
- Experience in designing and modelling Firebase database structures for efficient data storage and retrieval.

Database
- Worked extensively with Firebase Firestore for NoSQL database needs.
- Implemented Firebase Realtime Database for real-time data synchronization in mobile applications.

Professional Experience

Slab Measurement Estimate

Flutter - Firebase Developer

- Spearheaded the development of a precise slab measurement estimation mobile application using Flutter and Firebase.
- Integrated Firebase Authentication to ensure secure access and authorization for users.
- Leveraged Firestore as the backend database to manage slab measurements and user data efficiently..

Education

- Bachelor in InformaHon Technology – Pandit Deendayal Energy University(PDEU), India
